CCR Game Dev Session 1

Intro to Game Development using GDevelop

Table of Contents

What is your favorite game?

What a Game Developer?

Game developer is a professional or enthusiast who designs, creates, and programs video games. Their work involves turning creative ideas into interactive, engaging, and playable digital experiences by combining elements such as coding, art, sound, and storytelling.
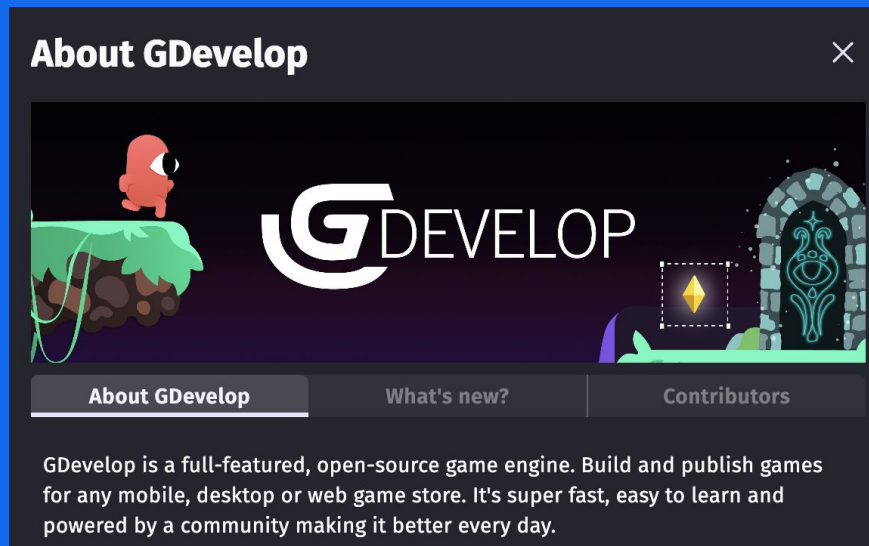

What is a Game Engine?

Game engine is a software framework or platform designed to simplify the development of video games by providing tools, systems, and pre-built functionalities for creating and managing various aspects of a game.

What game engine and code was used in making your favorite game?

What is GDevelop?

About GDevelop ✕

About GDevelop	What's new?	Contributors

GDevelop is a full-featured, open-source game engine. Build and publish games for any mobile, desktop or web game store. It's super fast, easy to learn and powered by a community making it better every day.
